

# Sunshine Nugget® and Silver Nugget®

*(The Silver Nugget mill does not have the powder-coat finish.)*

**The most reliable hand-operated flour mills!  
(Stone Burrs and stainless steel burrs)**

Most Credit Cards Accepted: \_\_\_\_\_

**STONES:** For centuries, stones have been the best way to get fine flour. Our stones are specially treated; use on all dry grains.

**STAINLESS STEEL BURRS:** We have perfected the metal burrs to give you a fine to a course grind of flour and you can grind any type of grains -- wheat, corn, beans - and it will even do your oily jobs like soybeans and nuts, and any damp or oily grains.

**LONG-LIFE BEARINGS:** The Nugget has been designed with long-life bearings so that it can be motorized, if desired. The HD bearings extend the life of the mill by eliminating excessive wear on the drive shaft and against the mill body. An AC or DC gear motor may be attached by owner or, upon request, a motorized unit can be prepared at the factory prior to shipping. (The rate of rotation should not exceed 60 RPM.)

**ADJUSTABLE:** Mill through a wide range of textures by just turning a knob -- fine flour to course cereal.

**CLEANING IS EASY:** The mill can be cleaned by simply extracting one screw to remove the outside stone or burr. Brush or wipe out the milling chamber.

**FLOUR COLLECTION:** A pan fits well under the milling chamber to catch the flour as it is being milled. There is no need for a special apparatus or aprons to funnel the flour into your pan.

**COMPACT:** The body is one unit of solid construction. You can bolt the Nugget mill to a table or counter top, or avoid drilling holes to secure it by using the clamping kit (included) to secure it. (The total shipping weight is approximately eight pounds.)

**WARRANTY:** The Silver and Sunshine Nugget mills carry a five-year limited warranty. See your instructions for details.

**MADE IN AMERICA:** The Silver Nugget® and Sunshine Nugget® grain mills are made to last forever -- designed for simplicity, engineered for quality.
